

Hi, I'm Alex Rivera

Front-End Developer | UI/UX Designer

About Me

I create engaging, user-friendly, and visually appealing websites. My passion lies in blending creativity with functionality.

My Skills

HTML & CSS

Clean, semantic, and responsive design.

JavaScript

Dynamic, interactive, and efficient front-end logic.

React

Component-based architecture with modern UI patterns.

Featured Project

Personal Blog Website

A responsive blog platform built using HTML, CSS, and JavaScript. It supports dark mode and smooth animations for a modern feel.
