## Welcome to My Website

This is a simple website layout created using only HTML tables. It demonstrates how tables can be used to structure content into different sections such as header, navigation, content, and footer.

## About Us

Our website is designed to help beginners learn the basics of HTML. We use only simple HTML tags like **table**, **tr**, **td**, **ul**, **li**, **a**, and **img**.

## Contact

You can reach us anytime via email at [info@example.com](mailto:info@example.com).
